

K Series Electronic Metering Pump

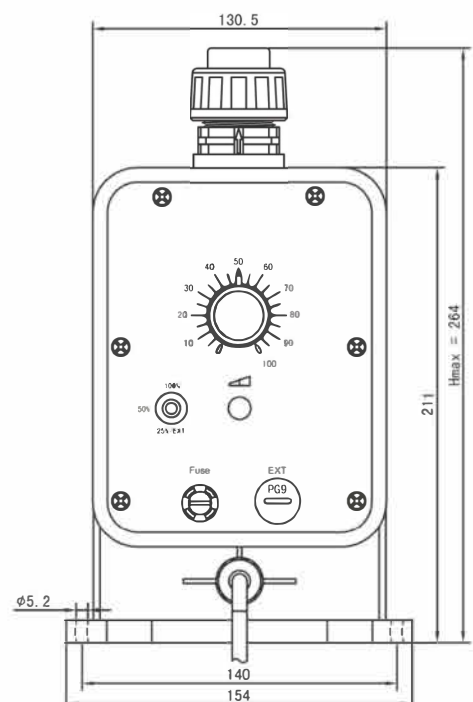

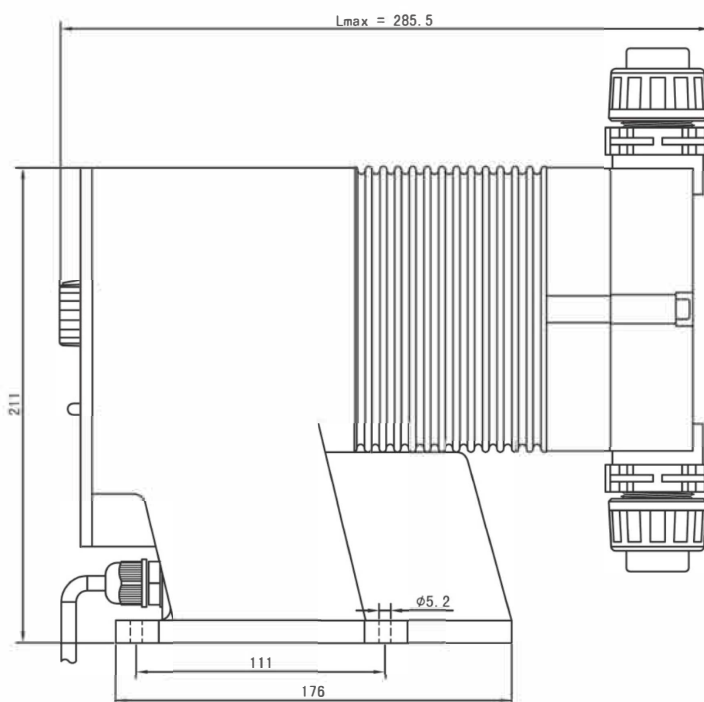

Product Advantages and characteristics:

- The housing made of Noryl Polyphenylene Oxide (PPO) with a good chemical resistance, strong and high durability.
- 5 Layers of PTFE composite diaphragm provide more stable flow pressure.
- The one-way valve adopts a double valve ball structure, and the valve seat is made of PTFE precision process, which exhibits more corrosion resistance.
- The electrical pure iron made of electromagnet produce higher suction flowrate.
- The high quality of high temperature enameled coil wire provides longer life span.
- The high quality of electrical component on the PCB board provides more stable and longer life span.
- Double adjustment of stroke length and frequency provide more flow regulation options.
